# WINDSHIELD WASHER CONCENTRATE WITH ANTI-FREEZE

M540

**GUNK® Windshield Washer Concentrate with Anti-Freeze** is a concentrated formula with ammonia specifically designed to protect windshield washer systems from damage caused by temperatures as low as  $-30^{\circ}\text{F}$ . A superior solvent for cleaning windshields in any season of the year. Quickly dissolves dirt, bugs, grime, and road film. Harmless to rubber, metal, painted surfaces and plastics when used in accordance to instructions.

| <b>DIRECTIONS: DILUTE IN ACCORDANCE WITH ALL LOCAL, STATE, AND FEDERAL VOLATILE ORGANIC CONTENT (VOC) REGULATIONS.</b>   |                     |                              |                            |                              |
|--|---------------------|------------------------------|----------------------------|------------------------------|
| <b>1) THIS IS A DILUTABLE CONCENTRATE; DO NOT USE WITHOUT PROPER DILUTION. DILUTE ONLY WITH CLEAN WATER. VOC BEFORE DILUTION IS 48% BY WEIGHT.</b>   |                     |                              |                            |                              |
| <b>2) DILUTION RATIOS FOR MOST REGULATED AREAS ARE LISTED IN THE TABLE BELOW:</b>  |                     |                              |                            |                              |
| <b>Dilution Ratio (Water: Conc.)</b>   | <b>Amount Water</b> | <b>Amount of Concentrate</b> | <b>Resulting VOC Level</b> | <b>Freeze Protection To:</b> |
| 48:1 (A)   | 6 gallons           | 16 fl oz                     | Less than 1%               | 32°F                         |
| 8:1 (B)  | 1 gallon            | 16 fl oz                     | Less than 6%               | 32°F                         |
| 6:1 (C)  | 3 quarts            | 16 fl oz                     | Less than 8%               | 20°F                         |
| 1.5:1 (D)  | 24 fl oz            | 16 fl oz                     | Less than 21%              | 5°F                          |
| 1:1 (E)  | 16 fl oz            | 16 fl oz                     | Less than 25%              | -5°F                         |
| 1:3 (F)  | 7 fl oz             | 16 fl oz                     | Less than 35%              | -25°F                        |
| <b>(A) A summer dilution for Federal EPA regulated areas ONLY — Maximum allowed VOC is 35%.</b>  |                     |                              |                            |                              |
| <b>(B) Summer dilution FOR UNREGULATED AREAS ONLY.</b>   |                     |                              |                            |                              |
| <b>(C) Minimum dilution that complies with Georgia regulations for Atlanta and surrounding counties and Maricopa County, AZ.</b>   |                     |                              |                            |                              |
| <b>(D) Minimum dilution that complies with Texas regulations.</b>  |                     |                              |                            |                              |
| <b>(E) Minimum dilution that complies with California regulations for use where freezing conditions exist (Type A areas).</b>  |                     |                              |                            |                              |
| <b>(F) A winter dilution for Federal EPA regulated areas ONLY — Maximum allowed VOC is 35%.</b>  |                     |                              |                            |                              |
| <b>NOTE: Certain areas in California where freezing weather occurs (type A areas) can use up to, but not more concentrated, than a 1:1 dilution with water. These areas include Del Norte, Shasta, and Trinity Counties; the Great Basin Valley, Lake Tahoe, Mountain Counties, and Northeast Plateau Air Basins as defined in Title 17, California Code of Regulations. FOR TEMPERATURES CONSISTENTLY ABOVE 32°F, USE GUNK® WINDSHIELD WASHER SOLVENT WITH AMMONIA, PART NUMBER M506.</b> |                     |                              |                            |                              |

A concentrated formula especially designed to protect windshield washer systems from damage caused by temperatures as low as  $-25^{\circ}\text{F}$ . A superior solvent for cleaning windshields in any season of the year. Will not harm rubber, metal or painted surfaces when used according to instructions.

**NOTE:** Undiluted concentrate may attack paint. If accidentally spilled on painted surfaces, immediately wash off with water.

**STORAGE, HANDLING & DISPOSAL:** Store in a cool, dry place below  $120^{\circ}\text{F}$  away from oxidizing agents, acids and ignition sources. Use in well-ventilated areas. Wear safety goggles, rubber gloves, protective apron and vapor respirator when handling material. DO NOT WEAR CONTACT LENSES. Use and dispose of product, container and residue in accordance with all local, state and federal laws and regulations. Emptied containers contain product residue so follow warnings even after container is emptied.

**DANGER:** DANGER. POISON. CANNOT BE MADE NON-POISONOUS. FLAMMABLE. DO NOT USE NEAR HEAT, SPARKS, OR FLAME. VAPOR HARMFUL. Contains Methanol (CAS# 67-56-1), Glycol Ether (CAS# 25498-49-1) and Ammonium Hydroxide (CAS# 1336-21-6).

**FIRST AID:** EYES: Avoid contact with eyes. Irritating. Can cause redness, burning-like sensation and optic neuritis. With repeated contact of high concentration, can cause superficial lesions of the cornea. Less severe contact can cause conjunctivitis, blurred vision, even blindness. Flush with water thoroughly, while lifting eyelids for 15 minutes and get prompt medical attention. SKIN: Irritating and with repeated contact can cause dermatitis, erythema and scaling. Skin absorption of high concentration can cause coma and eventually DEATH! Remove contaminated clothing and launder before reusing. Wash with soap and water thoroughly. If irritation develops get prompt medical attention. INHALATION: Irritating to mucous membranes. Can cause dizziness, narcosis, cardiac depression and eventually DEATH with severe exposure. Repeated contact of high concentration can have toxic effects of the nervous system, such as manic depression. Remove to fresh air immediately. If breathing becomes difficult get prompt medical attention. INGESTION: Can cause nausea, abdominal pain, headache and shortness of breath, later accompanied by blurred or double vision, eventually blindness. Severe exposure to high concentration can cause coma or DEATH! MAY BE FATAL OR CAUSE BLINDNESS IF SWALLOWED. POISON! If swallowed, DO NOT induce vomiting. Call poison control center, physician or hospital emergency room immediately.

NOT FOR SALE: CALIFORNIA (due to package size only)

**KEEP AWAY FROM CHILDREN AND ANIMALS**
